Scouting Operations in Southeastern Had this deposit of ore come under Changed politics. Arizona, Fort Grant, A. T. January Mendoza's explorers' observation, three hundred years ago, they would not have been withdrawn by his order Da from what is now known as Arizona . because of the want of a sufficiency of Accompanied silver to satisfy Spanish cupidity The King mine is simply wonderful and when better known it will be re garded as dwarfing the best of the Expect Nevada bonanzas in their palmiest days.

OLD AND NEW TUCSON.

The Changes Which a Few Years Have But a Vague Jumble of Words Devoid Brought to Our City-Hon. Joseph Wasson, Recent Visit to Arizona.

In the San Francisco Stock Report of the 13th appears a long letter from Hon, Joseph Wasson, descriptive of his recent trip through Arizons and New Mexico. The many old Arizonans who remember Mr. Wasson as one of themselves a few years ago, as well as the public generally, will read the following extract with in-The changes wrought in and about old Tucson since my first sojourn there are numerous and significant

enough of the tramp of Americans towards the old city of Mexico itself. riages without horses shall go" plainly made the following report, which was Two-story mercantile structures of modern brick, with wooden floors, and residences studded with bay-win- If the prophecy had been genuine, all bounded as follows, to wit: dows, form an almost amusing contrast. At that time the whites lived on the reservations and the Apaches | the last; with not even the fear of the Lord before them. Tucson contests the claim of Santa Fe, New Mexico, and St. heing the oldest town in the (now) United States. It is a curious claim, methinks; though I would have to see guitar bung on the willows, and the ley's reprint with these, it was found Art 2-'the said officer, at the expeevening after mass in the old church have been fulfilled a hundred times fice. on the Plaza. THE SHIPTON PROPHECY.

of Point or Application.

"Mother Shipton" was a veritable character who lived more than three hundred years ago and uttered many so-called prophecies, which were mostly vague jumbles of words without point and not applicable to any special event. A pamphlet containing a lot of these vaticinations was printed in London in 1641, and her "Life and Curious Prophecies" was published in 1667. In 1862 Mr. Chas. Messrs. Jones, Powers and Walley Hindley of Brighton, England, issued what purported to be an exact reprint or a "cheap-book version" of Mother Shipton's prophecies, "from the edi- and Messrs Snyder, Scott and Yanntion of 1648." In this, for the first a committee to draught a series of be time, the verses contained point, pith and application to events. All modern discoveries were predicted. "Car. time the Committee on Boundaries referred to railroads. The telegraph, adopted: steamers, discovery of gold in Callfornia, etc., were all shadowed forth. its predictions having been futfilled, ning at the mouth of the line have then the world must be prepared for theace running west down the Pho-
